

## Trolley Ultrasound Therapy

Ultrasonic Therapy Unit is most advanced, based on microcontroller based circuitry. It has 45 Pre program modes, user-friendly systems. Programmable Micro-controller based with Dual Transducer 1 & 3mhz.

Trolley based Ultrasound therapy machine move anywhere very easily. It's looking so gorgeous. 1mhz and 3mhz dual head help to treat all kind of patients. 1 head are very small size for treatment small joints like finger.

45 pre program are include common types of diseases where need apply Ultrasound therapy. Large LCD Display shown everythin like intensity, time, frequency, disease condition.

## General Features:

- Model: RSMS-450,
- Ultrasonic frequency: 1mhz & 3mhz  $\pm 5\%$
- Ultrasonic output: Max 3 watts /cm<sup>2</sup>
- Output mode: Continuous and pulsed
- Pulse ratio: 1:1, 1:4, 1:7, 1:9 and con.+ 5%, Puls 75% adj
- Power density: up to 3 watts /cm<sup>2</sup> +5% adj.
- Timer: Digital with alarm (99min) +10sec. max
- Pulse setting: Digital
- Head: Double Head

## Technical Specifications:

• Power input:	30VA 220V 50Hz AC + 20%
• Size:	<ul style="list-style-type: none"><li>◦ Wide-17"</li><li>◦ Length-16"</li><li>◦ Height- 34"</li></ul>
• Probe Size:	Large Probe-34mm, Small Probe-10mm
• Weight:	6kg
• Consumption:	85 Watts Maximum
• Fuses:	500mA
• Room Temperature:	10° to 40° C
• Moisture:	10% to 80%

## Standard Accessories:

- Ust head 2pcs
- Head connecting cable 2pcs
- Power cable 1pcs
